

Why am I applying?

It's refreshing to see a product that clearly started with the need and was built backward from there. I believe Product === Team and Chili Piper's success is no accident. I am excited to create tools, learn with the best, and embody empathy for co-workers and customers. I think that ChiliPiper is a great place to do that.

Why would you hire me?

> *Strong proficiency in JavaScript, including DOM manipulation*

Once, after a technical interview, the interviewer said that my Javascript skills were "Godlike."

> *Thorough understanding of React.js*

I would hope so! I have used it in web apps, websites, electron apps in both the freelance and team context.

> *Self-motivated and self-directed; Fast learner*

I have been described as a sponge. I might not know it all, but I try to own what I don't and learn it.

I could go on, but I'll save that for the first interview. I am looking forward to learning more about Chili Piper

In the meantime find out more about me at joshuawootonn.com
