

**Hi there!**

My name is Josh and I would love to work at Textio because the mission of further connecting humans is compelling.

Here are five of my beliefs:

### **Making something delightful should be default**

I believe that 'it works' is not good enough, and that the user experience can be equally as beneficial as the product's end result.

### **Experience does not make a developer**

Some people say that I soak up new things like a sponge. I believe that my passion and energy have accelerated my growth to compensate for the years of experience I lack.

### **If you want something you gotta bring it**

I want to be a part of making a great culture. Two traits I value are being unashamedly myself and empathetic to others. This might look like me including that new Kanye song in a demo, wearing yellow all summer, or jumping in to help when a coworker is in distress.

### **Hard things are just easy things in succession**

What really makes a problem hard is not being able to see the end of it. I have experience embracing the unknowns, iterating until the end is in sight, and moving forward even when my brain wants to remain paralyzed by fear.

### **All products are a reflection of the team**

Ultimately, creating a great product is about aligning great people around a common focus. The above four beliefs are the blocks that I bring to the team.

Let's talk soon if you share similar beliefs!
